

CORDEL WILLIAMS

Atlanta, GA | 470-331-3181 | cwilliams.gatech@gmail.com | [linkedin.com/in/cordelwilliamsgatech](https://www.linkedin.com/in/cordelwilliamsgatech)

EDUCATION

Georgia Institute of Technology

Atlanta, GA

M.S., Computer Science — Machine Learning Specialization 2022

B.S., Computer Engineering 2015

EXPERIENCE

Cisco Systems, Inc. Alpharetta, GA

Senior Software Engineer — Cisco Secure Firewall

Nov 2025 – Present

- Built and maintained automated test infrastructure for Cisco Secure Firewall, validating netflow correlation and eventing.
- Developed an internal bug triage ML model using Hugging Face to predict defect component ownership from issue titles, descriptions, and notes, reducing manual triage overhead and accelerating routing to the correct engineering team.
- Created custom Codex skills used agentically to accelerate engineering workflows across debugging, manual test execution, and automation code authoring.

Senior Software Engineer | Scrum Master

Nov 2024 – Nov 2025

- Promoted for consistently delivering high-quality, scalable code; led technical initiatives that improved system performance and drove measurable gains in customer satisfaction.
- Mentor junior engineers through structured code reviews and knowledge-sharing sessions, improving team velocity and code quality standards.

Software Engineer II | Scrum Master

Apr 2021 – Nov 2024

- Spearheaded security assessments for Cisco's Secure Network Analytics (SNA) product, identifying and mitigating vulnerabilities in proprietary and open-source dependencies across the product surface.
- Led end-to-end design and delivery of a deprecated-feature removal initiative in SNA, coordinating across multiple teams to ensure zero customer-impacting regressions.
- Served as Scrum Master for an Agile team of 6+ engineers; streamlined sprint workflows and communication channels, resulting in on-time delivery across multiple release cycles.
- Resolved critical customer escalations in real time for global enterprise clients, reducing mean time to resolution (MTTR) and preserving customer SLA commitments.

Software Engineer I

Nov 2016 – Apr 2021

- Designed and implemented a Failover System for Stealthwatch, improving system redundancy and uptime by 40% system handles millions of network flow records per second on Vertica.
- Developed TACACS+ remote authorization for Stealthwatch, securing \$10M+ in government contract revenue by maintaining required federal security certifications.
- Built a centralized network management system, streamlining device configuration, topology discovery, and flow data ingestion at scale.
- Optimized high-throughput flow data pipelines in Vertica, sustaining processing of millions of network flows per second under peak load.

Macy's Systems and Technology

Atlanta, GA

Java Developer

Jan 2016 – Nov 2016

- Engineered TALOS, an in-house logistics platform, improving warehouse efficiency and order fulfillment throughput across multiple distribution centers.
- Developed Spring Boot microservices for critical business workflows, improving system scalability, fault isolation, and maintainability of core retail operations.

TECHNICAL SKILLS

- **Languages:** Java (8+), Python 3, SQL
- **Cloud & Infrastructure:** AWS (Solutions Architect — in progress), Docker, CI/CD (Jenkins/GitHub Actions)
- **Frameworks & Tools:** Spring Boot, Hibernate, REST APIs, Vertica, gRPC, Codex, Claude Code, Windsurf, Github Copilot
- **Testing & Quality:** Automated test frameworks, contract testing, adversarial/security testing, regression pipelines
- **Observability:** Network telemetry, flow data analytics, system performance monitoring
- **Certifications:** Advanced Certified ScrumMaster (A-CSM); AWS Certified Cloud Practitioner; AWS Solutions Architect Associate (in progress)
